WHAT ABOUT US

what she said what she gave she can't remain i can't be again
what she said what she gave she can't remain i can't be again

what about us
what about her life
what about me
what about us
what about us
what about me
what about her
what about us

I just can listen my conscience
I will got it when i'll go with the flow
I just can listen my conscience
I will got it when i'll go with the flow

what about us
what about her life
what about me
what about us
what about us
what about me
what about her
what about us

I just can listen my conscience
I will got it when i'll go with the flow
I just can listen my conscience
I will got it when i'll go with the flow

GO FIRST

know any word i can obey
know any name that i cannot betray
gimme a place where i can lay
gimme one choice to lie or pray
and i'll follow like a slave for you

you know the word that i wanna obey
you bear the name that i cannot betray
you want the child that i was a day
and you just choose to let me play
and i'll follow like a slave for you
please begin you first you begin you
so please begin you first you begin you

you know the word that i wanna obey
you bear the name that i cannot betray
you want the child that i was a day
and you just choose to let me play
and i'll follow like a slave for you
please begin you first you begin you
so please begin you first you begin you

not with imposition not with obviousness
not the choice to be unlike the rest
hands to size or to mesh
money like a closet for all noble feelings
feelings richness of the poor people
it could be wherever you are
this is not as like
you are not like i imagined
my life is not like i want and
nothing is like i wanted for me
time is too much
to live it
i'm losing my way why?

i was waiting

look at me now

there is my face without my soul

and i don't know where is my soul exile

time is incautious and now you understand

i've been searching for the truth only the truth

i can understand where are you coming from

and i can't understand what you are thinking

and i can't remember anything

the more i see the less i see

i'm watching the first light

no wanted forme ma immagined

i've not come, back i've not come back, i've not come back for you

i've not come, back i've not come back, i've not come back for you
